## Further Training

|                                                                                                                                                                  |         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| <b>Center for Sociological, Economic, Political and Anthropological Research – PUCP</b> , Computational Research Tools for Socio-political Analysis – Lima, Peru | 06/2024 |
| <b>Center for Sociological, Economic, Political and Anthropological Research – PUCP</b> , Inferential and Applied Statistics for Social Analysis – Lima, Peru    | 04/2024 |
| <b>Media Lab – PUCP</b> , Data Extraction and Processing with Python – Lima, Peru                                                                                | 01/2024 |

## Selected Work Experience

|                                                                                                                                                                                                                                                                                                                                                                         |                   |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| <b>Intern</b> , ETH Zurich – Remote<br>Project <i>Causal Inference and Innovation Patterns in the Social Sciences</i> at the Social Networks Lab.                                                                                                                                                                                                                       | Starting 09/2026  |
| <b>Research Assistant</b> , Pacific University Research Center – Lima, Peru<br>Project <i>Automation and Generative Artificial Intelligence in Peruvian Employment</i>                                                                                                                                                                                                  | 07/2025 – 10/2025 |
| <ul style="list-style-type: none"> <li>Conducted interviews with users and experts on the impact of traditional automation and generative artificial intelligence across different sectors of the industry.</li> <li>Carried out a thematic analysis of the interviews, identifying the opportunities, socio-economic risks, and limitations of these tools.</li> </ul> |                   |
| <b>Senior Research Analyst</b> , Ipsos – Lima, Peru<br>Innovation Service Line                                                                                                                                                                                                                                                                                          | 10/2023 – 07/2025 |
| <ul style="list-style-type: none"> <li>Designed and conducted market research studies to assess innovation in products and services, analyzing and visualizing survey data to extract actionable insights.</li> <li>Managed multiple projects simultaneously, collaborating closely with internal and external teams.</li> </ul>                                        |                   |
| <b>Research Assistant</b> , Pacific University Research Center – Lima, Peru<br>Project <i>Informality and Digital Platforms</i>                                                                                                                                                                                                                                         | 08/2023 – 12/2023 |
| <ul style="list-style-type: none"> <li>Conducted surveys and in-depth interviews with over 70 digital platform workers, systematizing data to identify patterns in perceptions of informality, technology, and the role of institutions.</li> <li>Created reports using data visualization tools with Python and Excel.</li> </ul>                                      |                   |
| <b>Research Assistant</b> , University of Exeter – Amazonas, Peru<br>Doctoral project <i>Promoting entrepreneurship among Indigenous peoples: enabling agency or imposing a development model? The case of the Awajún people in the Peruvian Amazon</i>                                                                                                                 | 11/2021 – 02/2023 |
| <ul style="list-style-type: none"> <li>Assisted in the review of academic literature and institutional documentation.</li> <li>Collected qualitative data through participant observation, surveys, interviews, and workshops with farmers involved in development projects during five months of fieldwork.</li> </ul>                                                 |                   |

## Volunteering

---

**Volunteer**, Computational Text Analysis Summer School at the Institute of Analytical Sociology 06/2026

- Supported event logistics and attended lectures and hands-on workshops on LLMs, transformers, word embeddings, and topic modelling.

**Quantitative Data Specialist**, Danish Social Innovation Club (DANSIC) 12/2025 – Ongoing

- Design the quantitative methodology of a mixed-methods research project examining labour market integration of students in Denmark, with a focus on the effects of migration and educational background.
- Build a reproducible pipeline to process and join pre-aggregated survey data across multiple Excel files, applying relational data principles to connect student characteristics with employment outcomes.

**Applied Researcher**, Vamos Chamo 12/2023 – 12/2024

- Developed a country profile based on socioeconomic and development indicators to facilitate access to information for Venezuelan immigrants through a WhatsApp chatbot.

**Coordinator**, Young Professionals for Agrarian Rural Development (YPARD) 05/2020 – 11/2021

- Conducted research on rural youth and strategies for territorial political advocacy and prepared the strategic document: “Between the Breaches of the Past and the Challenges of the Present: Rural Youth in the Face of the Covid-19 Pandemic”.

## Skills

---

**Programming:** R, Python, SQL, Git

**Data Analysis & Methods:** Survey design and analysis, regression modelling, web scraping, NLP (topic modelling, word embeddings, LLM-based extraction and classification), data visualization

**Languages:** Spanish (Native), English (Proficient – C1), German (Proficient – C1), French (Intermediate – B1), Portuguese (Intermediate), Swedish (Intermediate)
